

## Experience

### Smart Bill Startup

Dec' 21- Present

Full-Stack developer at Smart Bill startup. Working on a mobile application using React-Native and Typescript, and a web application using React-JS and Typescript as the clients, the Backend developed using Node.js with Typescript.

- I am part of a team that is responsible for developing this new mobile application and new website to help our customers manage their invoices online.
- I have proved myself as a pretty solid and quick learner as I managed to learn and improve with tools and technologies (such as Typescript and React-Native) on the job. As a developer, I'm always expected to improve my code and make it more generic and robust.

## Education

### Udemy

Oct'21-Nov'21

MERN eCommerce From Scratch

- Built an eCommerce platform from the ground up.

### FullStack Web Developer

Apr'21-Jul'21

Kernelios Cyber College

Rishon Lezion, Israel

- Client-Side: HTML 5, React, CSS3, Javascript, asynchronous development, protocols, Rest API Server, Redux and Context API.
- Server-side: Node.JS, HTTP Server, Rest API, Routes, No SQL (MongoDB). Working with Git and Heroku.

### Mekif Vav - high school

Sep'10-Jun'17

Ashdod, Israel

- I was part of the excellent program.
- Five points in English and ,math. My Advanced courses are: 10 points in computer science and 5 points in economy-pschicology.

## Army

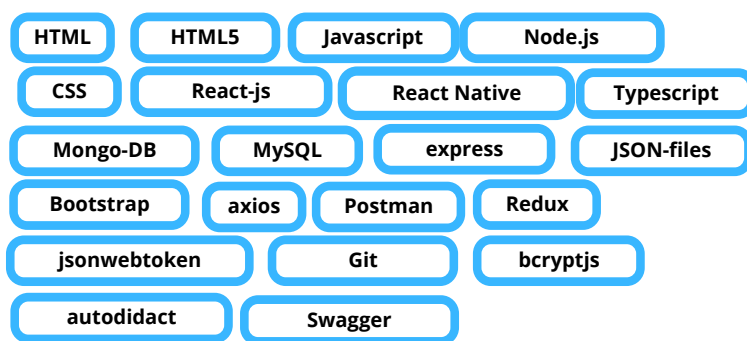

### Network administrator

Aug' 18- Apr'21

Served as a network administrator in the IDF.

Located in the southern part of Israel, it is considered one of the most active scenes in the middle east. Network administration requires the ability to resolve issues quickly while working in a stressful environment. Toward the end of my tenure, I was promoted to command my team, mainly planning strategies and implementing them using my subordinate soldiers.
